Fuel Economy Guide

January 17, 2012

Looking to calculate your car's gas mileage? In the market for a new vehicle, and want to find out which cars are the most fuel efficient?

This site, developed by the U.S. Department of Energy and the EPA, can help you do that and more. Here you can find tips on how to maximize your vehicle's fuel efficiency, or how to choose the right hybrid vehicle, should you be interested. Find it here: www.fueleconomy.gov

Find other car-related sites on our "Automotive" links page: poklib.org/usefullinks/Automotive.html

The screenshot shows the Fuel Economy website in a Windows Internet Explorer browser. The address bar displays <http://www.fueleconomy.gov>. The page header includes the U.S. Department of Energy and U.S. Environmental Protection Agency logos. A navigation menu contains links for 'Find a Car', 'Tips', 'Save Money', 'Benefits', 'Your MPG', 'Hybrids & Electrics', 'Diesels', 'Alternative Fuels', 'More...', and 'New Window Sticker'. The main content area features a large banner for the 'Find a Car' tool with the text 'Looking for a cleaner, more fuel efficient vehicle? Our Find a Car tool can help!' and a list of features: 'Newly redesigned', 'Fast, flexible search options', and 'Improved layout'. Below the banner is a grid of four utility links: 'Find and Compare Cars', 'Your MPG', 'Save Money', and 'Hybrids and Electrics'. A red arrow points to the 'Save Money' link, which includes sub-links for 'Gas Mileage Tips', 'Fuel Cost Calculator', and 'Find the Cheapest Gas'. The browser's taskbar at the bottom shows the Start button, the active window 'Fuel Economy - Wind...', and the system tray with the time '1:41 PM'.
