## Time Zone Converter

May 14, 2013

When one has a relative abroad, or is planning a trip some distance away, it is sometimes either desirable or necessary to make contact via a long-distance phone call- or Skype. Nobody wants to accidentally wake up the concierge--or their sister-- at 3 a.m.!! Use this great [time converting tool](#) before you dial, or click "Skype now"!

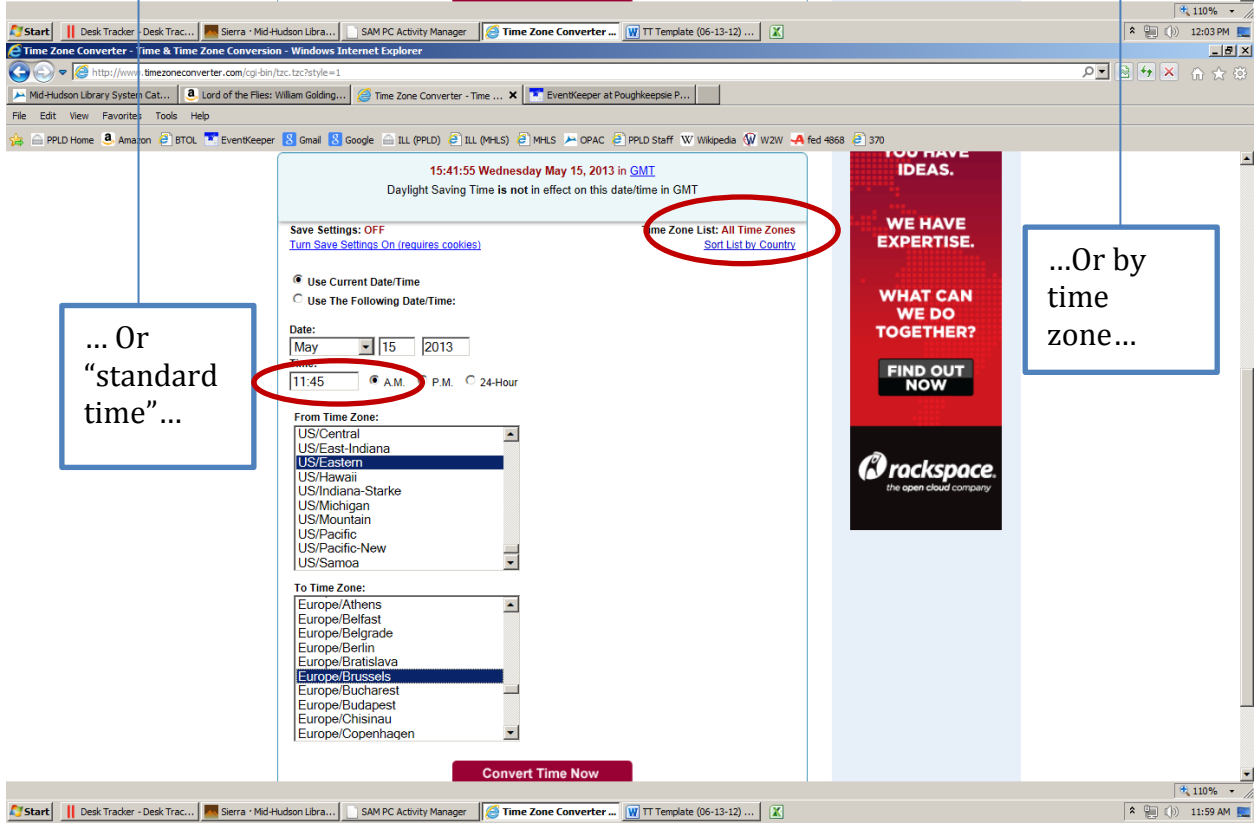

The screenshot shows a Windows Internet Explorer browser window displaying the Time Zone Converter website. The browser's address bar shows the URL <http://www.timezoneconverter.com/cgi-bin/tzc.tzc?style=1>. The website's main heading is "Time Zone Converter - Time & Time Zone Conversion". Below this, there is an advertisement for "Ag Farming Software" from www.TouchMemory.com, which offers labor tracking, time, and attendance services. The main content area features a conversion tool with the following details: the current time is 15:41:55 on Wednesday, May 15, 2013, in GMT. A note indicates that Daylight Saving Time is not in effect on this date/time in GMT. The "Save Settings" option is turned OFF, and the "Time Zone List" is set to "All Time Zones". There are two radio buttons: "Use Current Date/Time" (selected) and "Use The Following Date/Time". The date is set to May 15, 2013, and the time is 15:41:55. The time format is set to 24-Hour. On the right side of the page, there is a vertical banner with the text: "YOU KNOW WINDOWS. WE KNOW CLOUD. YOU HAVE IDEAS. WE HAVE EXPERTISE. WHAT CAN WE DO TOGETHER? FIND OUT NOW". The browser's taskbar at the bottom shows several open applications, including Desk Tracker, Sierra Mid-Hudson Library, SAM PC Activity Manager, and the Time Zone Converter website. The system clock in the bottom right corner shows 11:42 AM.
