Chilton's: More Than Just Repair

November 8, 2011

Although most users go right to the Repair section of the database, there is also a lot of useful information in the "Bulletins/Recalls" section of the Chilton database.

Example: Search for a 2008 Honda Accord -- Then, click the "Bulletins/Recalls" tab

Notice that there are two search boxes at the top. In the box on the left, you can search by 'system' (electrical; steering, etc.), by 'symptom' (check engine light; engine noise at start up), or by 'trouble code' (e.g.-P0300).

In the box on the right, you can search the "TSB#" (Technical Service Bulletin), or by any 'keyword'.

TSBs will show up on a list below if there is a problem in the system you select, or a match for the word you enter. Otherwise, you get a "no matches found" message.

CHILTON LIBRARY
