Improve Your Keyboarding with Keybr

August 1st, 2017

[Keybr](#)

[Keybr](#) offers free exercises and lessons aimed towards improving typing speed. Keybr's Touch Typing exercises give users the skills to type using muscle memory to locate keys thereby significantly improving a user's keyboarding ability. Users can alter settings to complete guided lessons, or type texts from websites or custom text. With guided lessons, as the user progresses and improves, the key set is gradually expanded until a full range is achieved.

Track Your Progress

Keybr lets you know how many typing lessons you've completed, your average and top speeds, letters you may need practice with, and charts your progress as your speed improves and your skills advance.

Multiplayer Mode

After you've spent enough time practicing your typing skills you may want to test those skills against other players! In the multiplayer section you can compete against other players in a typing "race". The faster you type, the faster your car goes. The fastest typist wins!

You won the race!
