State Facts for Students -- U.S. Census Bureau

July 31, 2018

[State Facts for Students](#) is a data access tool from the U.S. Census Bureau. Students can explore data about their state and compare the results to other states. Explore State Facts for Students with your kids to find out which state has the third biggest population, what is the second largest city in California, what is the statehood date of New York, the number ice cream and frozen dessert makers in New York State, etc.

The screenshot shows the 'State Facts for Students' website. At the top left is the 'United States Census Bureau' logo. To its right are navigation tabs: 'Activities' (By subject and grade), 'Resources' (For teachers and students), 'Standards' (Common Core, GAISE, Other), and 'About' (Contact Information). A search bar is located in the top right corner. Below the navigation is a blue banner with the title 'State Facts for Students' and a small photo of students. The main content area features a large, colorful map of the United States with state names and icons. A yellow callout box in the center says 'Grab your state data & go! Use the list or click on a state in the map below' and includes a 'Select' dropdown menu. Below the dropdown is a link: 'Click here to use State Facts for Students in classroom activities'. On the left side of the map is the 'STATISTICS IN SCHOOLS' logo. On the right side, there is a link that says 'Tell us what you think'. The map includes Alaska, Hawaii, and Puerto Rico, along with various state icons like a bear for Alaska, a cowboy hat for Texas, and a hot air balloon for Florida.

This good resource provides students a wide variety of population, social, and economic information for the nation.
