Hudson Valley Weather

March 6, 2018

T.S. Eliot may have proclaimed April 'the cruelest month,' but those of us in the northeast know better. March can be a month of *weather* to be sure, you never know at the beginning how the day may end. That is why [Hudson Valley Weather](#) is such a great resource for local weather coverage. Other weather sites can often skim on local details in order focus on other national weather stories, so it is nice to have such a comprehensive weather source whose focus is truly local.

Weather Forecasts and News Reports

We provide localized and detailed forecasts for the Hudson River Valley of New York state and weather for the Catskill Mountains. Counties covered include but are not limited to:

- Columbia County, NY
- Delaware County, NY
- Dutchess County, NY
- Greene County, NY
- Orange County, NY
- Putnam County, NY
- Rockland County, NY
- Sullivan County, NY
- Ulster County, NY
- Westchester County, NY

You can find current [radar](#) and conditions, as well as a five-day forecast & [detailed forecast](#) blog that is frequently updated for any upcoming weather events in the region:

FIVE DAY FORECAST

Monday Discussion : Watching Wednesday

March 5, 2018 by HVW

We'll have a quiet but chilly start to our work week across the Hudson Valley. Lots of sunshine and temperatures generally in the 30s to near 40° for a high on Monday. After a chilly night Monday night with lows in the low 20s across the valley (upper teens in the Catskills)... Tuesday will see a cold start, before temperatures moderate into the low and mid 40s during the afternoon for highs.

That allows us to talk about Wednesday, which is really the only thing on everyone's mind anyway. We have another upper level low pressure diving into the central US, it will continue to roll eastward, into the Ohio Valley late on Tuesday. At the same time, we'll see a wave of low pressure develop along the front side of the upper level trough. Where that coastal low pressure goes, will have a major impact on our weather for Wednesday...
