Need to learn coding in a hurry? Don't worry! There are plenty of easy games that make coding easy and fun to learn.

**CodeCombat**
If you have little-to-no experience with coding, this site teaches the basics of JavaScript, Python, and CoffeeScript.

This site focuses mainly on teaching JavaScript and Python. The interface can be slightly confusing for beginners but is great for puzzle enthusiasts.
Programming Hero
This site allows users to build their own game similar to Space Invaders. The game is engaging and awards users for milestones passed in the learning process. It’s focus on more on the general basics of coding so Programming Hero isn’t geared for any specific code language.

CodinGame
This is considered the premier coding game program for beginnings to experts. Users can learn up to 25 different coding languages including Java, C#, and Rust.

Happy Coding!
