

Solid Flap

DIY Gift Box

Scan for a visual instruction guide:

You will need:

Scissors (or craft knife)
Hole puncher (optional)
String (optional, not included)

1. Cut out entire shape.
2. Use scissors or craft knife to make a slot on one flap, then repeat with the other. Tip: if using scissors, it might be helpful to slightly fold the paper over to make the cut.
3. Fold the box along the dotted white lines to make the base. Then fold and bring the two solid flaps together.
4. “Squish” those flaps down slightly, and insert them into one of the slots.
5. Insert your treats.
6. Close the box, by inserting the flaps into the remaining slot.
Optional: Punch a hole, add a ribbon to hang it.

Fun fact: The gold starburst pattern is from the end papers of the book *Wit and Wisdom of the Ages* from the Local History Archives. End papers are the first and last sheets of paper that appear inside the front and back covers.
